Over the past five years, 90% of our students accepted a full-time position within three months of graduation. During that time span, our graduates earned a median starting salary of $65,000, with 15% of graduates earning a starting salary above $80,000.

The key reason our students are so highly coveted by employers is that our program is truly applied. Our students not only learn economic theory and data analysis, but also learn how to apply that knowledge in real-world situations. Our students learn how to build models based upon economic principles and how to test, interpret and, most importantly, explain the findings.

Recent graduates have accepted jobs in a wide variety of fields ranging from market research, consulting and public-sector planning to insurance, health care, banking and finance.

No matter which path you choose, the Lindner Applied Economics program will provide you with the skills and knowledge to succeed.

Program Highlights

- Nine out of 10 students secure full-time positions within three months of graduation
- Students are hired by many of the country’s most respected companies such as J.P. Morgan, Nielsen, Procter & Gamble and Fifth Third Bank
- Named one of the nation’s Top 10 Applied Economics programs by Education Portal
- Students can augment their degree with SAS certification
- Students can complete the program in as little as 12 months
- Merit-based scholarships are available
- Opportunities exist to partake in paid internships and research while in the program
